## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi.

In regard to claim 1, the Kobayashi reference discloses a “fuel vapor recirculation system” (see Fig. 2) comprising a “filler tube” 5 with “sealing means” 15, a “vapor recirculation path means” A, a “vapor storage device” 1 and a “flow control valve” 29, as claimed.

In regard to claim 4, “float operated valve” 26 is in fluidic series with valve 29.

In regard to claims 8 and 14, the method as claimed would be inherent during normal use and operation of the device.

### ***Allowable Subject Matter***

Claims 2, 3, 5-7 and 9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments, see papers filed 8/1/05, with respect to the rejection(s) of claim(s) 1, 4, 8 and 14 under Saitoh have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Kobayashi.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Benjey et al. reference pertains to another fuel vapor control valve having an obturator with a passage therethrough, similar to Applicant's device.
